

## New Care Options and Financial Pathways to Pay for Care Medi-Cal CalAIM

### *Do you have Older Patients you are Worried About...?*

We Specialize in Seniors & Older Adults

For Anthem Medi-Cal patients, we offer specialized Assessment and Care Planning for Older Adults *and those with similar health and wellness needs*

Person-centered care coordination through CalAIM, including:

### **Enhanced Care Management** for:

- **Adults at risk for institutionalization:**  
Adults who are eligible for long-term care services who, in the absence of services and supports would otherwise require care for 90 consecutive days or more in an inpatient nursing facility.
- **Nursing facility residents:**  
Adults who want to transition to the community, who are strong candidates for successful transition back to the community and have a desire to do so.

### **Community Supports** for:

- **Nursing Facility Transition/Diversion to Assisted Living Facilities,** which offers transitional assistance *including financial pathways to pay for Assisted Living!* This is NOT the Assisted Living Waiver (ALW)  
Your patients will receive help and funding to transition from a nursing facility to a home-like, community setting providing ADL care and support. Under this Community Support, there are also pathways to prevent nursing facility admissions for your patients with imminent needs.
- **Community Transition Services/Nursing Facility Transition to a Home,** which assists individuals live in the community to avoid further institutionalization by providing non-recurring set-up expenses for individuals transitioning from a licensed facility to a private residence.
